

CONNECT LITE

The Smarter, Simpler Fleet Safety Solution

ACETECH introduces CONNECT LITE, a next-generation, easy-to-install safety & monitoring device designed for your non-emergency fleet. Built for simplicity and scalability, it integrates effortlessly with ACETECH's Vehicle Intelligence platform, ensuring all of your fleet is risk-free in one unified software platform.

Challenges Emergency Services Face

CONNECT LITE provides real-time insights to help fleet managers make **smarter decisions, optimize performance, and reduce costs**. With GPS location, speed & status and a selection of vehicle data points, your non-emergency fleet are now available in the same platform through a cost effective solution. Ensure these vehicles are safe, roadworthy and compliant in addition to the operational insights and situational awareness benefits for lone workers. With its scalable design, **CONNECT LITE** is the perfect solution for fleets of any size.

Why Choose CONNECT LITE?

Compact & Easy to Install

- Small, lightweight design with quick installation in any vehicle.
- No complicated wiring or technical expertise required.

Seamless Integration

- Integrated into ACETECH's Vehicle Intelligence platform
- Monitor & manage service vehicles alongside frontline emergency vehicles with ease, for unified fleet management.

Real-Time Vehicle Visibility

- Locate vehicles live with precise GPS location updates.
- Gain insights into vehicle usage, location, and performance.

Cost-Effective Fleet Management

- Affordable solution for fleets of all sizes.
- Reduce fuel costs, improve driver safety, and increase efficiency.

Scalable & Future-Ready

- Grows with your business as you add more vehicles.
- Flexible for logistics and non-emergency vehicle management.
