

# SUSTAINABILITY INTELLIGENCE

## Sustainable Solutions to Guarantee our Futures Tomorrow

ACETECH introduces **SUSTAINABILITY INTELLIGENCE**, a fully connected and customizable suite of solutions to help services on their journey towards a sustainable future. From **Solar Panels**, to **Sustainable Driving Programs** to ACETECH's unique and patented **ECO-RUN Technology** to reduce engine idling automatically, we have the solution to suit your needs.

### Creating a Sustainable Future

**ACETECH SUSTAINABILITY INTELLIGENCE** reduces emissions for fleets of all sizes, while also reducing fuel consumption & idling time.

**ACETECH ECO-RUN** monitors vehicle idling and proactively shuts down the vehicle and then restarts it to maintain safe battery levels while keeping a comfortable environment for staff and occupants.

**ACETECH CONNECTED SOLAR** provides a free source of energy to ensure batteries are always charged, reducing downtime and costly battery replacements.

**ACETECH SAFE & SUSTAINABLE DRIVER COACHING** ensures your vehicles are driven safely and maximise fuel economy.

### Positive Impacts to Your Fleet

#### Green Fleet

Reduce your fleets fuel consumption & carbon emissions and transform to a greener & cleaner fleet. Improve air quality for your staff and the people they serve.

#### Regulatory Compliance

Integrating sustainability initiatives into your business positions your service to meet changing regulations.

#### Performance & Fleet Availability

DEF Systems in diesel engines do not perform effectively during long periods of idling. By reducing idle time, you reduce your vehicle off road (downtime) as well.

#### Cost-Effective Fleet Management

Minimize fuel consumption costs, as well as engine wear & tear & maintenance costs creating a more cost-effective fleet.

#### Analytics & Reporting

Maintain optimal performance of your fleet with **ACETECH SUSTAINABILITY INTELLIGENCE**. Easy to report your CO2 impact to sustainability bodies.
